Activating this sector will bring occupants good luck and prosperity this year. The Southeast can be activated with a water feature, lots of activities, mongoose spouting jewel, Liuli glazed crystal prosperity fishes, number 8 crystal or crystal cluster. It is thus great to spend time in this sector in 2018 (unless it is the kitchen, toilet or storeroom) to enjoy prosperity, good fortune and relationship with others.

Those residing in rooms in the NW sector of your office/ home will benefit from the auspicious energy, bringing triumph, innovation and success in 2018. Tap into its good energy by displaying the victory banner or tortoises figurine especially those made of metal, gold or bronze in this part of your office/ home or your living room. With it, there will be plenty of strong family luck, marriage for singles and romance for those who seek it, especially if they are utilizing the S of the home. This star number 4 is excellent for students, academics, writers and those in the communications line. It is excellent for the office environment if the S is a commonly utilized place. However, if your home's basic energies are afflicted in the Central sector, the #9 will magnify the existing afflicted energies. The basic flying star energies are determined when I first did your home's or office's audit.

### **Inauspicious Locations/Directions**

#### **1.6        NORTH (#5 Yellow Star)**

The most unlucky of all stars is the #5 Yellow (wu wang) star. This vile star is in the North in the year 2018. It will affect the middle son or the young males in the office or household. If this is the main entrance sector or bedroom, it is important to stay protected against this vile star as it may block success and create problems for everyone in the family or office. Make sure that you place **the 8" 5 element pagoda filled with either crystal chips or raw earth to symbolize the pagoda capturing and locking up this most unlucky star, else new products made in brass, bronze or other metal such as the Heart Sutra Pillar or Golden Mantra Pillar (cannot be placed in kitchen, bedrooms, toilets or on the floor) can be utilized as well.** If the North is a main activity area, ensure you have at least 2 of these cures. Spend as little time in this area as possible. Alternatively, hang up 6 pieces of 6 rod all metal wind chimes to counter this star. Do not disturb the North this year, i.e. begin or end renovations, drill, knock or chop down trees, dig the earth especially when this sector has the 3 killings energies as well. Minimise activity in the North in order to avoid triggering off the destructive energies that cause serious misfortune. If this is the kitchen, it may be better to cook less as the fire energy from cooking may aggravate the misfortune 5 star, do not cut in this kitchen in 2018. More metal pots and pans should be displayed out.

Remove all earth element items such as crystals, porcelain vase or stone objects from this part of your office/home. In addition, do not have any Fire (red, pink, orange) or Earth (yellow, beige, light brown) elements in these areas.

Please note that unless suppressed, the wu wang (5 Yellow) brings severe illness, accidents and loss that occur in many aspects of life, especially if your main entrance is in the North sector or you are utilizing it as an office or sleeping in a North room. Prevention is better than cure, so do not wait until it is too late.

#### **1.7        NORTHEAST (#3 Jade Star)**

The #3 Jade star is often regarded as quite unlucky as it often brings conflict and argument to the company/home or the aggravating energy of litigation and court cases. For 2018, it is in the Northeast and especially if this NE sector is at the main entrance, bedroom or your office room. It is a wood star, and this year with this argumentative and unhappy star located in the NE earth sector it will affect the youngest son or young males in the household and office. If this sector is utilized often, everyone will be subjected to more mood swings and may affect the harmony at home or office. Residents will be easily stressed and relationships will be strained. In order to reduce the quarrelsome & argumentative tendencies, we need to control this star with more yin fire (eg Red, Pink or Orange) energy. Thus place a laughing Buddha, a mandala sticker (not in bedrooms of couples), golden mystic knot, red crystal apple or triangular crystal, a red crimson ball or the golden mystic knot decals to control the quarrelsome energies in the NE. The latest items such as the 7 Royal Emblems Red Plaque, the 9 Amulets Plaque or the Mahaboudhi Stupa (not in kitchens, storerooms, toilets, bedrooms of couples or on the floor) are also effective in controlling this conflict star.

### **1.8 WEST (#2 Black Star)**

The #2 black star is regarded as rather unlucky as it brings illness (flu, fever, cough bug or other serious illness) to the residents of the house. This year it has flown into the West of the home, it is important to protect this part of your home, especially if it is a commonly utilized area and can affect everyone. It may bring about serious illness or residents may be more susceptible to viruses and falling ill easily. To safeguard against falling ill, especially if this is a your room or the main entrance area, it is recommended to have the Herbal Wulou, the Golden Garuda Wu Lou (new) or Medicine Buddha plaque (not in the kitchen, toilet or bedroom) or a bronze wulou with coins if it is a couple's bedroom, to capture the illness energy. Alternatively, either have lots of metallic items, hang the 6-rod metal wind chimes or place the 3" bronze wulou with bagua or 6 emperor coin ruler in order to control this vile star.

Remove all earth element items such as crystals, porcelain vase or stone objects from this part of your office/home. In addition, do not have any Fire (red, pink, orange) or Earth (yellow, beige, light brown) elements in these areas.

### **1.9 EAST (#7 Red Star)**

The violent star #7, also known as the red star brings chances of burglary, theft and metal-related accidents, in 2018, it afflicts the eldest Son of the family the most. It is a number that can cause aggression, accidents, mishaps and metal-related injury. It can also cause political turmoil and sparks aggressive behaviour that can become something serious very fast. The best way to overcome this star is to have a pair of rhinoceros or a blue rhinoceros with elephant to protect and safeguard your home. New cures such as the Dragon Tortoise supporting a Totem with Elephant and Rhinoceros can be utilized provided it is not the bedroom and should not be placed on the floor. It is important not to have too much metal or crystal or the colours of Earth (light brown, yellow or beige) and Metal (white, silver or gold) in the E of the home/ office in 2018. More Blue or Grey should be used in this area. If your main entrance or bedroom is located in the E of the house, it is important for the family members to carry a blue rhinoceros or black obsidian wulou charm for protection.
